

$\frac{1}{2} \left(\frac{1}{2} \right) = \frac{1}{4}$

1925

The image is a very low-quality, high-contrast scan of a document. It appears to be a ledger or a form with several sections. At the top, there are some faint, illegible markings that might be "1911" or "1912". Below this, there are several rows of text, but they are too blurry to read. There are also some numbers and symbols scattered throughout. The overall appearance is that of a heavily degraded or overexposed photograph of a printed document.
